Northwind Bikes: Sales strategy 2027

Confidential: Sales team leads. Author: Jakob Volbracht, Head of Sales. Date: 2026-11-04.

1. Summary

Sales strategy 2027 sets how we grow from the Model T1 base to the Model T2 launch. I commit the Sales team to a 2027 sales target of EUR 14.5M, up from EUR 9.8M in 2025, driven mainly by the Model T2 launch on 15 March 2027 at a retail price of EUR 2,690.

The plan rests on three moves: widen the dealer network in Benelux and DACH, hold a firm discount guardrail, and add two SDRs to feed the dealer pipeline.

2. Key figures

Item	2027 commitment
Sales target	EUR 14.5M
Dealer count	from 62 to 90 dealers by end of 2027
Model T2 price	EUR 2,690 retail; dealer discount capped at 12%
Hiring	2 SDRs: Amsterdam is filled, Rotterdam is new
Quota per Account Executive	EUR 1.6M each

3. Dealers and regions

I will open 28 new dealers in 2027, taking the network from 62 to 90. Benelux, led by Sanne Visser, adds 10 dealers and DACH, led by Elena Costa, adds 18. New dealers start with the standard onboarding checklist and a launch allocation of Model T2 units before the 15 March 2027 launch.

4. Pricing guardrail

The retail price of the Model T2 is EUR 2,690 and we do not move it in 2027. Dealers may receive a discount of at most 12 percent. Anything above needs my written approval, and no team lead can approve it alone.

5. Team and quotas

I am hiring 2 SDRs to book dealer meetings. Each Account Executive carries a quota of EUR 1.6M for 2027. Team leads own the quota review each quarter and report pipeline coverage to me; the target coverage is 3x quota.

6. Next steps

Team leads confirm regional dealer lists by 15 December 2026. I present the final plan to Clara Vogel in January 2027.
